

PESTIVAL event – Howick ward’s Pest Free Project

We invite you, your parents and friends to an evening to learn why and how you can be pest trapping in your backyards! Our urban environment is an important habitat for birds, insects and reptiles. They can only thrive if pest numbers are low.

On this evening, **Howick Local Board** and Auckland Council will provide:

- A **FREE** rat trap for you to take home to use in your backyard for the duration of the project
- A demonstration of how to set/unset the traps and give you a chance to practice
- Advice on placing traps at home and disposal of the pests caught
- Instructions on how to record your pest programme data
