

# Trap Library East Auckland

Thank you for expressing interest in participating in the **Howick ward Mustelid Trapping Line Project**. The project aims to establish a coastal trapping zone extending from the northern side of Wakaaranga Creek in Pakuranga around to Turanga Creek near Whitford, including Bucklands Beach peninsula and the Mangemangeroa valley, protecting our local birdlife and the predator free status of our nearby Hauraki Gulf Treasure Islands.

If you agree to participate, we will place a trap and/or monitoring device on your property. The trap is fully enclosed in a wooden tunnel and is both pet-safe and childproof. Monitoring devices may include a camera or an inkpad tracking tunnel.

We will need to enter your property occasionally to inspect and maintain traps, replace lures and gather monitoring information. Advance notification of visits will be given.

We request that you check the trap on your property from time to time but do not expect you to deal with any catches. In fact, unless we have trained you in their use, you are not to open the trap enclosure. When you observe that the trap has been set off you are asked to contact us and a project volunteer will come to clear and reset the trap. We will send you a monthly email reminding you to check the trap and inform us of the result.

If this sounds like something you are keen to be involved in, please complete the following details below:

I/we wish to participate in the Mustelid Trapping Line Project and give consent for the project to:

- Place trap / monitoring equipment on my/our property.
- Make periodic visits to inspect and maintain the project equipment.
- Send a monthly email including project news and request for trap check information.

I/we undertake to

- Provide trap check information at least monthly.
- Respond in a reasonable time period to project requests to visit our equipment.
- Not interfere with any project equipment.
